NUTRIMAIZE 66

- High protein and high sugars
- High technology bonded urea
- Urea released at a safe rate in the rumen
- Versatile - can be used in dairy, beef or sheep diets

Nutrимаize 46 A high protein liquid feed based on pure cane molasses and bonded urea. Ideal as a major dietary protein source to balance maize silage and other low protein forages and feeds. Ideal as a maize balancer or for diets based on whole crop wheat. The high nutrient density of Nutrимаize 66 is designed to make it perfect for very high yielding dairy cows. This allows sufficient nutrients to be supplied in a relatively small volume.

Typical Analysis

Dry Matter	71	ERDP	531 g/kg	Salt	1
Crude Protein %	66.0	NDF	N/A	Calcium	0.9
Crude Protein from NPN %	62.0	Sugar	55.0	Phosphorous	0.7
ME	10.0	Starch & Sugars	55.0	Magnesium	0.4
Total Sugars (as invert) %	50	FME	9.9	Potassium	1.5
Ash	11.7	Oil (EE)	0	Sodium	0.2

Recommended Feeding Rates

- Dairy/Sucklers 0.5 -1.25 kg/hd/day
- Beef/Dairy Heifers 0.25-1.0 kg/hd/day
- Ewes 0.05-0.08 kg/hd/day

Please seek nutritional advice before feeding in a diet that contains Grass Silage
